# What is Omniscreeen Pilot?

Omniscreeen Pilot is an enterprise digital services solution that is **cost-effective**, **customisable**, and **easy to use**. It provides seamless and reliable rich media delivery functionality, including

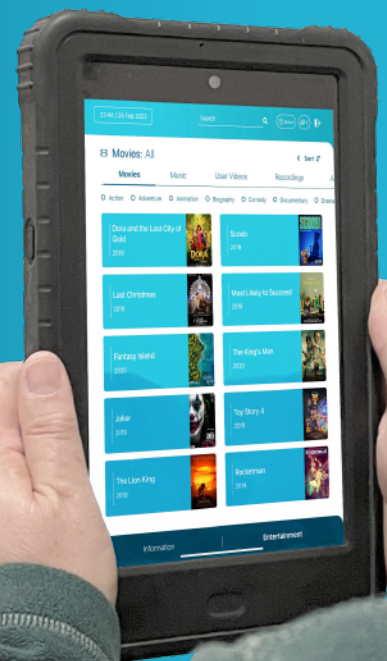

**live TV, movies, audiobooks, ebooks**, as well as a wide variety of applications such as **targeted announcements, digital signage, video visit** and others, all integrated into one product.

## Solution for your needs

Omniscreeen Pilot addresses most enterprise requirements including Government/corporate offices, broadcast and AV studios, public venues, hospitals and aged care facilities, hotels/resorts, cruise ships, airlines and railways, mining camps, and other locations alike.

Omniscreeen Pilot can be customised to your needs and budget as each industry faces its unique challenges. Our solutions can be easily implemented into your existing network architecture, or built from the ground up. It can be deployed as a physical appliance or in the cloud as a service offering.

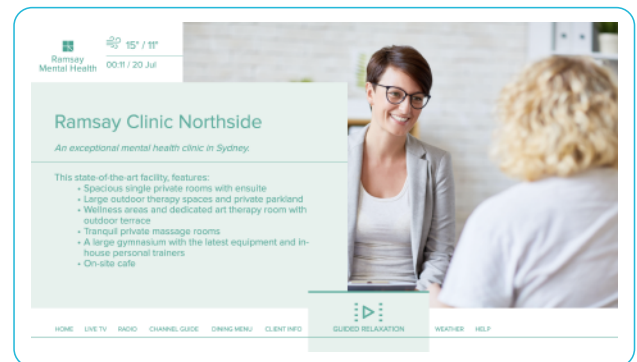

# Enterprise IT Ready

Microsoft® Active Directory (LDAP) and Single Sign-On (SSO) integration is available on request. Authorised users may have different access levels subject to their operational role within your organisation.

# Proven and Reliable

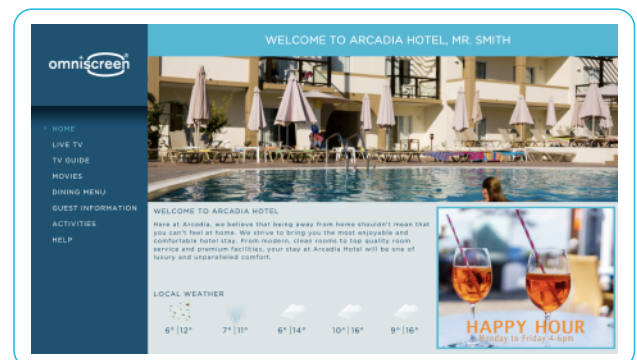

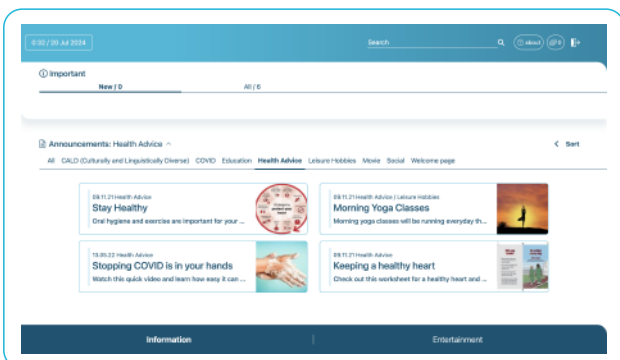

Omniscreen Pilot has been tested and proven in harsh conditions, remote locations, and high-traffic networks. Its reliability is augmented by comprehensive technical support, either remote or on-site.

## Innovative and Flexible Technology

Omniscreen Pilot's modular design provides the ability to add new services and interfaces, all under a comprehensive permissions system, which manages access to content and services. Content can be scheduled, uploaded, censored, and organised by user, device, location or time.

Omniscreen is intuitive for administrators and users alike. Users can easily navigate Omniscreen through mobile and desktop devices as well as displays and televisions. Administrators can easily manage content, services, and information from just one single web browser interface.
